

Addendum to the Trackstar Manual
January 1, 1989

Correction to the parts list:

Trackstar 128 manual Page 30
Trackstar E manual Page A-2

Monitors using the "composite" style of video input have been gradually replaced by higher performance monitors using TTL or RGB video systems.

Since demand for composite monitors has dropped substantially over the last few years, we are no longer shipping the composite video adaptor cable with the Trackstar Product.

If you need this cable for the installation of your Trackstar, one can be obtained at no charge by writing or calling:

Diamond Computer Systems
470 Lakeside Dr.
